**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 4 and 8-16 drawn to a process for identifying a disease associated molecular marker.
- II. Claims 2-3, drawn to a method for identifying disease associated molecular marker with post-translational modification.
- III. Claim 5, drawn to a process for identifying a binding molecule capable of binding a subset of diseased cells.
- IV. Claims 6-7 drawn to a process for identifying a binding molecule capable of binding a subset of diseased cells with post-translational modification.
- V. Claim 17, drawn to a disease associated molecular marker.
- VI. Claims 18-28, drawn to a binding molecule.
- VII. Claims 29 and 30, drawn to a binding molecule with a tag.
- VIII. Claims 31-32, drawn to a method for treating a subject.

- IX. Claim 35, drawn to a method for typing a cell.
- X. Claim 37-40, drawn to a nucleic acid and cell.
- XI. Claims 41-45, drawn to a cell comprising the  
expression system.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV, VIII and IX are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to different methods with different process steps resulting in different end results.

Inventions V-VII, X and XI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to different products with different functions, effects and structures.

Inventions (I-IV, VIII and IX) and (V-VII, X and XI) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have

different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to different statutory subject matter i.e., different methods and different products.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and the search required for Group I is not required for Groups II-XI, specifically the non-patent literature searches, restriction for examination purposes as indicated is proper.

Claims 14, 27, 30 are generic to a plurality of disclosed patentably distinct species comprising:

- A. Diseased cells (claim 14)
- B. Binding molecule (claim 27)
- C. Tag (claim 30)

Each of the species recited in e.g., subgroup A are different types of diseases and the identification and/or treatment of which are different.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species **from each of the subgroups A-C**, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or

identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
